

## What can your shop process?

Process beams, channels, angles, HSS and plate using just one PythonX Structural Fabrication System. Get everything done at once including cut to length, produce bolt holes, copes, bevels, slots, notches, miter cuts, piece marks and layout marks for connection plates/clips. *Eliminate costly material handling*, dramatically decrease your man hours per ton, increase your capacity, make better use of your shop space and become the lowest cost fabricator with the PythonX.

Process this beam in **10 minutes 13 seconds** with the PythonX

- 13 Bolt Holes
- 3 Slots
- Web Trim
- 9 Letter Piece Mark
- Square Up Cut
- Flange Notch
- 3 Copes
- Miter Cut/Trim
- 4 Layout Marks

# ONE PYTHONX MACHINE CAN PROCESS ALL YOUR STRUCTURAL STEEL
